

NOISEQC

Control by Sound & Vibration

Improve Quality of your Products with NoiseQC

Improving quality assurance

Get effective and objective results with the Go-NoGo test

Recognition of the type of defective product

NoiseQC recognises the most occurring errors

Increased yields

Get more insight knowledge for production improvement

User Friendly

Solutions for each of your products with external triggers

Software Highlights

Following the growing need for quality control in factories, Geonoise has launched NoiseQC, the software for manufacturers wishing to improve their quality control methods and productivity. Through this visually based and easy to use tool, the tests for Go-NoGo and practical statistics are directly available to the user.

Geonoise — Acoustical Consulting — Sound Instrumentation and Calculation Software

6/54-56, Thanon Poemsin Soi 42 - Sai Mai Bangkok 10220 Thailand

Improving Quality Insurance

Through the analysis of sounds and/or vibrations, NoiseQC software can objectively analyze the functionality of your products and determine whether the product can be marketed (Go) or has to be set aside for further inspection (NoGo).

Together with NoiseQC there is a SoundBOX which can be fitted with either a microphone accelerometer.

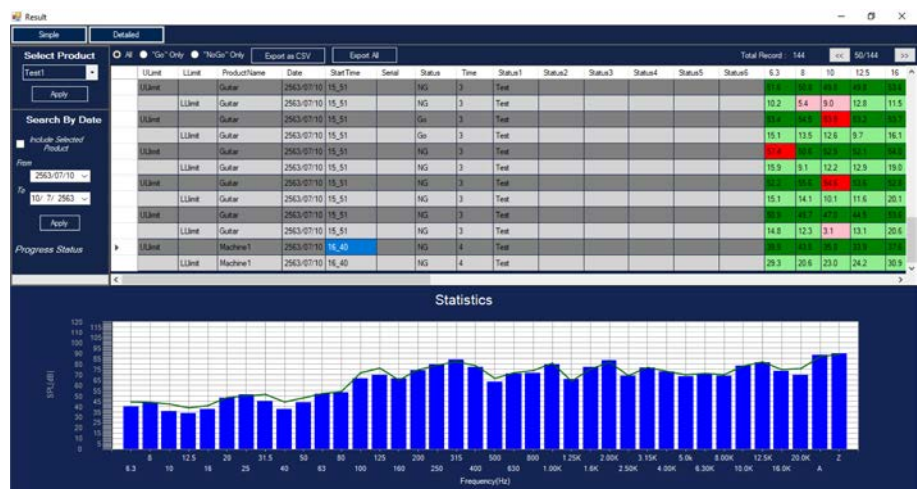

Don't hesitate to ask us a list of Norsonic hardware products that are compatible with NoiseQC software.

Recognition of Defects

Through recognition of recurring defects of your products, you will become acquainted with points of improvement needed for your facilities.

Increased Yields

All products tested by NoiseQC are registered and are consultable both by software and by CSV files. So with an automatic data study, you will know your returns with details and recurring faults.

User Friendly

NoiseQC is easy to handle and easy to use by the workers in the production line, external triggers are available such as remote start & stop, switch pedal and the push button.

Try our demo for free

In www.noiseqc.com you will find tutorial videos and guides of how to use the software. Geonnoise also offers a 2 weeks demo downloadable from our website.
